

# Prevent Child Abuse New York's Prevention Network

## It's Your Turn to Make a Difference

The Prevention Network is an affiliation of individuals and organizations who care about New York's children and families. It unites voices advocating for the prevention of child abuse and neglect; facilitates education, information and resource referral; fosters community collaboration; and enhances community awareness about child abuse prevention efforts.

### Why Should You Join?

Our children are our future. Raising a healthy, happy child is not a one person effort – it requires the support of a whole community of people. By working together, we can help families develop the skills they need to overcome the challenging situations in which many parents find themselves.
